NOTICE OF WITHDRAWAL OF NOTICE OF ENVIRONMENTAL CONDITIONS

WHEREAS, On June 25, 2014, the United States Environmental Protection Agency (EPA) recorded in the Clerk and Recorder's office of the City and County of Denver a Notice of Environmental Conditions, see reception number 2014074074 concerning the real property (referred to as "the Property") located at 3552 Monroe Street, Denver, CO 80205, and more particularly described as follows:

L 3 & 4 & N 5FT L 5 BLK 12 O J FROSTS ADD

WHEREAS, For purposes of indexing in the County Clerk and Recorder's office Grantor-Grantee index only, EPA shall be considered the Grantor, and Mr. James C. Dulaney and Mrs. Yolanda J. Dulaney shall be considered the Grantee. Nothing in this Notice shall be construed to create or transfer any right, title or interest in the Property.

WHEREAS, The Property is within the boundaries of Operable Unit 1 of the Vasquez Boulevard and Interstate 70 Superfund Site (Site), as described in the Record of Decision (ROD) signed by United States Environmental Protection Agency (EPA) on September 25, 2003. The ROD established cleanup objectives for lead and arsenic in residential soils to protect human health and prevent unacceptable exposures to adults and children. The levels at which the EPA determined that lead and/or arsenic in soil in residential yards present an unacceptable risk (the so-called "action levels" in the ROD) are 400 parts per million (ppm) or greater for lead and 70 ppm or greater for arsenic.

WHEREAS, EPA has discovered that EPA cleaned up the Property in 2008, therefore the Notice of Environmental Conditions was recorded in error, and levels of lead and arsenic in residential soils at the Property are below the action levels EPA established in the ROD.

NOW, THEREFORE, NOTICE is hereby given that the Notice of Environmental Conditions recorded by EPA with the Clerk and Recorder's office of the City and County of Denver on June 25, 2014, reception number 2014074074 is **withdrawn**.

The Property was cleaned up by EPA in 2008. Residential soils at the Property with lead or arsenic levels above the action levels established in the ROD were excavated and transported off-Site for disposal and clean soils were brought in to replace the excavated soils.

The records regarding sampling and clean up at the Property and other documents relevant to the Property and the Site, generally, may be requested from:

U.S. Environmental Protection Agency, Region 8
Superfund Remedial Program, Remedial Project Manager
